

## USER'S MANUAL

---

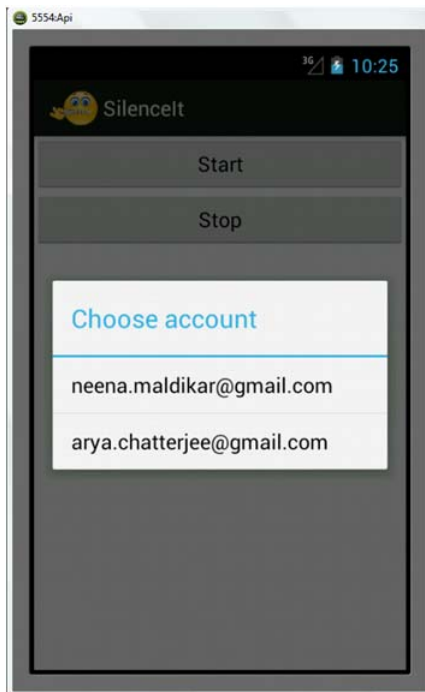

1. Install the application.

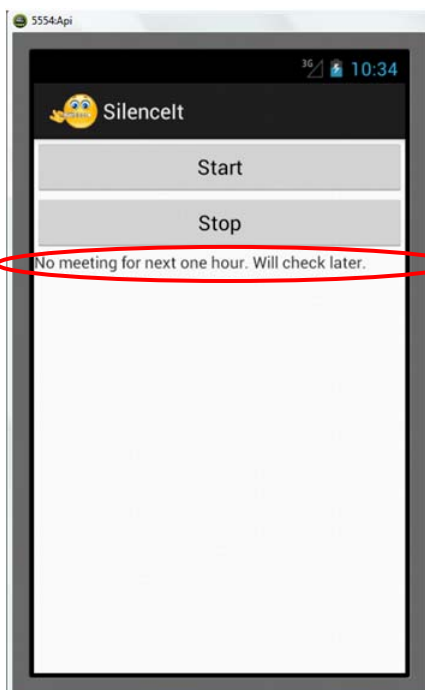

2. Once you enter the application, you will get the main screen of the application with 'Start' and 'Stop' buttons

3. Click Start button. If there are more than one accounts set up in the 'Setting>Google Account' on your Android phone, the application will ask you to select one of the accounts. If there is only one account, it will be selected automatically and this screen will not come.

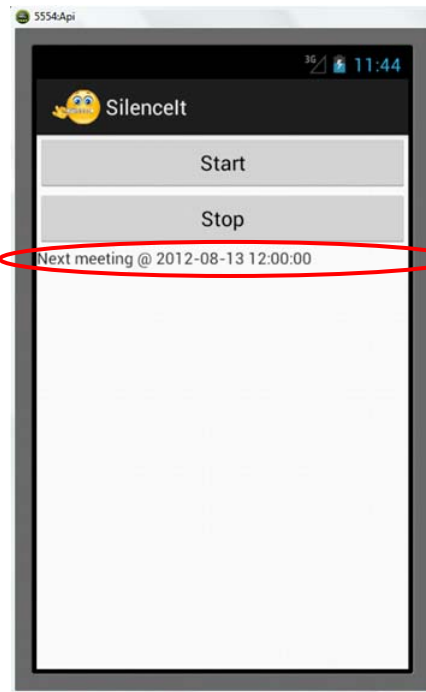

4. After you have selected an account, the app will look up the Google Calendar and see if there is any event starting in next one hour and has status busy. If there is no such event, it will display a message as below and will schedule itself to check after one hour. You can close the application.

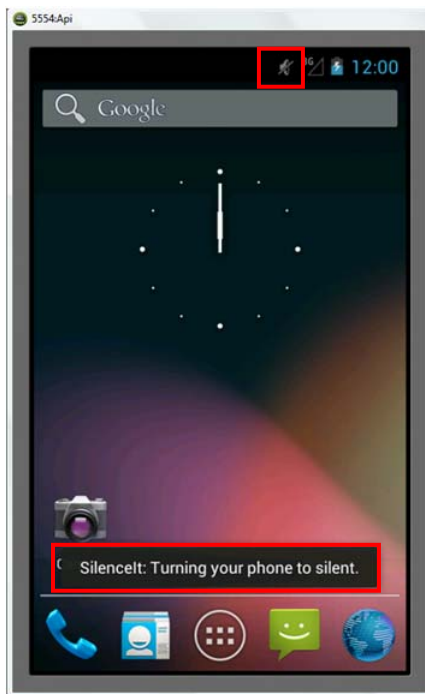

If you resume the app after 1 hour, there will not be any message displayed here. The app works in the background to check your Google Calendar.

5. On clicking 'Start', if there is/are an event/s with status busy beginning in next one hour, the app will schedule to turn your mobile phone silent at the beginning and normal at the end of the first event. It will also display a message. You can close the app.

If you close and resume the app, there will not be any message displayed here. The app will work in the background and check your Google Calendar after this meeting

6. The phone is turned silent at the beginning of the event and a notification is displayed.

7. The phone is turned back to normal at the end of the event and a notification is displayed. At this time the app also checks for the event with status busy within next one hour and behaves as mentioned in points 4 and 5.

8. If you want to stop the application, click on 'Stop' button.
